EDU4TEX 2.0 project (2017-1-UK 01-KA201-036609) has been funded with the support of the European Commission. The information reflects the views of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

What is EDU4TEX?

An exciting opportunity for you to learn more about the diverse range of careers that the Textiles Industry has to offer by working together with your teachers, careers advisors and industry experts.

What's in it for you?

Through collaboration with schools, engaged businesses and industry experts from across Europe we will create a variety of activities that will be delivered alongside your studies to help you gain awareness and skills needed for a successful career in textiles.

How will we do this?

At the centre of the project we are trying to identify what your aspirations are and what companies are looking for. Once we know this we will create activities to bring you and businesses together by illustrating the wide range of technology and science based careers that could be on offer.

What is our goal?

We are trying to increase awareness of the careers available in the Textile Industry as well as give you the skills needed to compete for opportunities that are out there by taking you out of the classroom and into the textiles environment.
